

Tribute films for the families you care for

White-label trade price list — present it as your own. Delivered before the service: no software, no editing, no staff time.

We craft beautifully edited tribute films from a family's photographs and home videos — done for you, under your name. Your arranger forwards a link; a finished, crematorium-ready film comes back before the service.

Why offer this?

- Crematoria typically charge families around **£95 for a basic, pictures-only slideshow** — and the funeral home earns nothing on it.
- Specialist studios charge families **£195–280** for a proper tribute film.
- Ours are yours to price and mark up — a far richer film than a crematorium's basic slideshow: 50–100 photos with real motion design, home video woven in and licensed music, and you keep a healthy margin on every funeral.

How it works

1

Send us the photos

Your arranger forwards our upload link to the family — they add photos and clips from their phone. That is all you do.

2

Family approves a preview

We edit and send a private preview link. Changes are free. Nothing plays on the day unseen.

3

Delivered before the service

With 48 hours' notice, guaranteed before the service in the format UK crematoria accept — or it is free.

Our promises to you

- **Before the service with 48 hours' notice, or it's free.** Standard turnaround is 48–72 hours; same-day express is available.
- **Free re-edits.** A wrong photo, a spelling fix, a different song — changed without question, inside the timeline.
- **It will play.** Every film is delivered in the exact format UK crematorium systems accept — the Obitus and Wesley Media family-supplied video spec, full-HD 16:9 — ready to upload straight to your venue's screen; portrait screens matched on request.
- **Discretion and care.** Family photos are treated as strictly confidential and deleted after delivery unless the family asks us to keep them.
- **Music, done properly — and no copyright risk to you.** Every film is scored with fully licensed music, cleared for the family to keep, share and post anywhere. For their meaningful song, we time the film to it and the crematorium plays the track live over the film at the service — the exact song, no licensing headache for you or them.
